How we work	20

Most AI is built for someone else's customer.

We build ours for the shopkeeper in Birbhum, the advocate at the Calcutta High Court, the student learning to code and the product team that needs it to hold up in production. And we hold it to the standard of people who started out in cyber security.

WHAT CEHPOINT DOES

01	**An AI platform**	Chat, agents and an API, in English, Hindi and Bangla, with answers checked against today's web.
02	**Cyber security**	Penetration testing, monitoring, audits, AI red teaming and forensics, by the team that also writes the code.
03	**Software and automation**	Products, AI agents and modernisation, shown as a working demo first and handed over for you to own.

A note from our founder

Cehpoint started as a place to learn cyber security in Bengali. That beginning still decides how we build.

Before we wrote any AI, we taught people how systems get broken into. The habit stayed with us. When we build something, we first ask how it could fail, who could misuse it and what the person on the other end actually needs. Only then do we ask how impressive it looks.

Cehpoint AI comes from that habit. It answers in English, Hindi and Bangla, because most of the people we want to serve do not think in English first. It checks its answers against today's web and shows where they came from, because a confident wrong answer about GST, a court date or a medicine costs real money. And it is priced so that a student, a kirana owner or a small firm can use it every day without a dollar card.

We are a founder-led company from West Bengal, and we work with businesses across India and abroad. We show a working demo before we ask for a commitment. We fix the price in writing before work starts. When the work is done, we hand over the code, the servers and the keys. And when AI makes a decision inside one of our products, a person stays accountable for it.

The same team that builds our AI also tests it the way an attacker would. Our agents run each user in a separate, locked-down workspace. Our security tools scan only what a customer has proved they own. None of this is decoration. It is what we would want if we were the customer.

This brochure sets out what we have built, what it costs and how we work. Everything in it can be tried today at ai.cehpoint.co.in, or talked through with our team.

Jit Banerjee
Founder and Director, Cehpoint

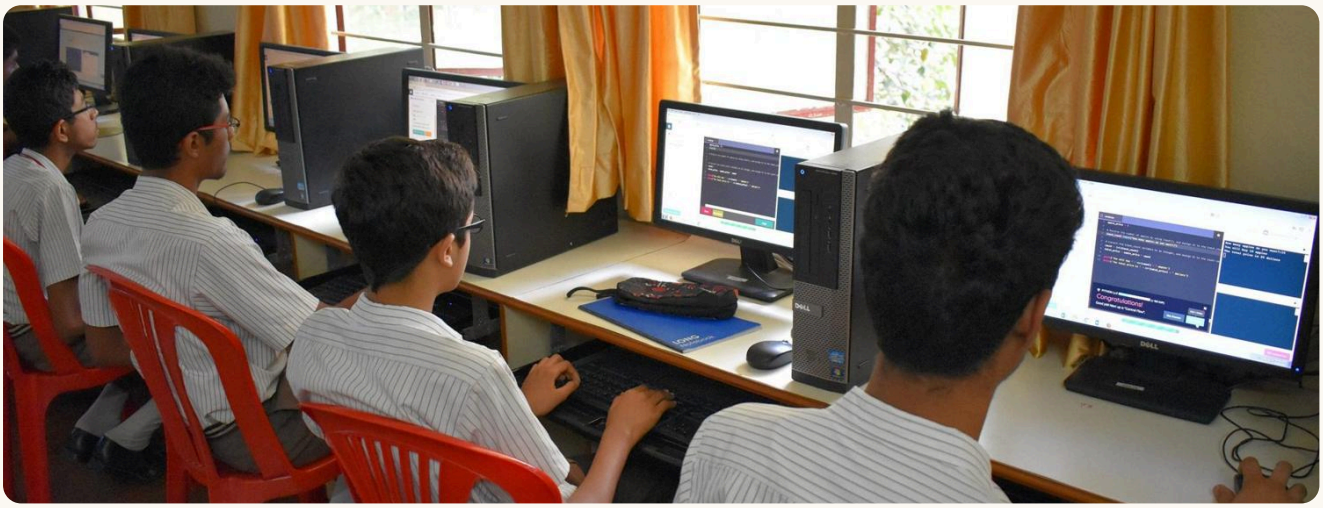

WHAT WE HOLD OURSELVES TO

"None of this is decoration. It is what we would want if we were the customer."

WHO WE ARE

One accountable team for AI, software and security.

Cehpoint is an Indian AI, software and cyber security company, registered in Labpur, Birbhum, West Bengal. We build, secure and run production systems for businesses in Kolkata, across India and abroad, and we make our own AI platform, Cehpoint AI, for individuals, developers and companies.

Students learning to code at a school in Bangalore. Photo: Nayakyashraj, CC BY-SA 4.0, Wikimedia Commons.

Demo first
You see a working demo before you commit. Scope, timeline and price are agreed in writing before work starts.

You own what we build
The code, the accounts and the keys are handed to you. No lock-in, and no meter you did not agree to.

A person stays in charge
Our AI products keep a named person accountable for every decision that matters.

Security inside the build
Testing, monitoring and forensics sit with the team that writes the code, not with a separate vendor.

Registered office
Sandipan Pathsala Para, Fullara Temple Road, Labpur, Birbhum, West Bengal 731303

Billing
In rupees, with a GST invoice. Clients outside India receive a written quotation in their own currency.

Languages
English, हिंदी and বাংলা, across the product and the team.

01

Cehpoint AI.
Built in India, for the way India works.

Chat, agents, an API and a set of deeper tools, in English, हिंदी and বাংলা. Free to start, with plain prices when you need more.

A rainy street in Kolkata. Photo: Jorge Royan, CC BY-SA 3.0, Wikimedia Commons.

THE PLATFORM

One platform, many ways in.

Every Cehpoint AI product runs through one gateway. It sends each request to a suitable model, checks current facts against the live web, applies the same safety rules everywhere, and moves to another model when a provider slows down, so you are not left waiting.

Chat

Ask, write, read documents, make images and video.

FOR EVERYONE

Agentic AI

Agents that plan and finish multi-step work.

FOR TEAMS

API

Text, images, video, speech and web reading.

FOR DEVELOPERS

Cehpoint AI gateway

Model routing and failover · Live web checks · Your documents · One set of safety rules

Labs

Research, data, practice and scripture study.

FOR DEEPER WORK

AI Experts

An AI CA and an AI lawyer, with people behind them.

FOR TAX AND LEGAL

Security toolkit

Scanners, LLM red teaming, recon and CVE lookups.

FOR DEFENDERS

INDIVIDUALS

₹0 to start

Free use every day, no card. Premium chat ₹100 a month + GST, launch price until 31 December 2026.

DEVELOPERS

₹5,000 a month

Developer plan with commercial use. The keyless API stays free for building and testing.

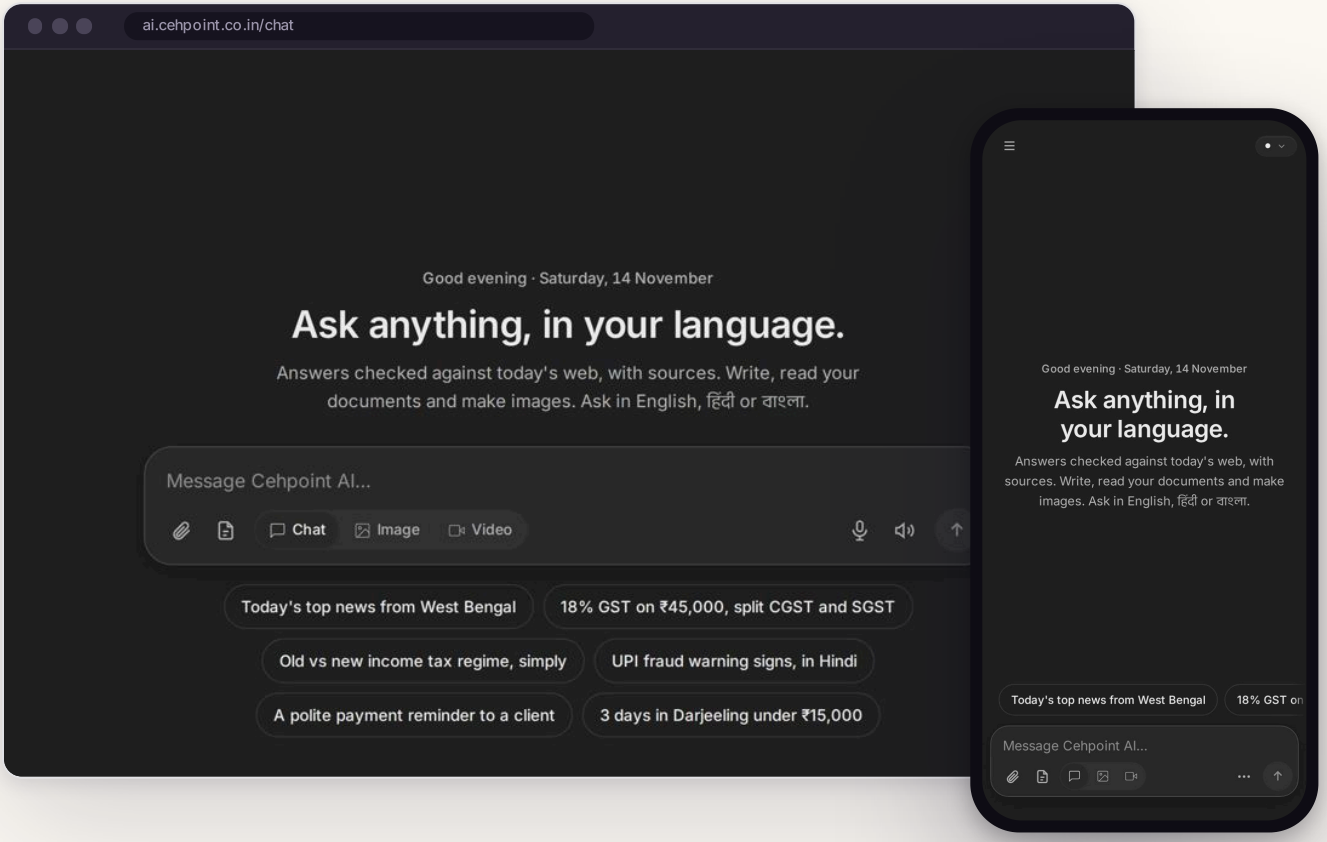

BUSINESSES

₹50,000 one time

An AI agent for one job, or Business AI for the life of your business. Annual licences for larger firms.

CEHPOINT AI CHAT

Ask anything, in your language.

Checked against today's web
Questions about prices, rules, news or dates are checked live, and the answer shows its sources.

English, हिंदी, বাংলা
Ask in the language you think in. The reply comes back in that language and script.

Your documents
Upload a PDF or a scan and ask questions about what it actually says.

Images and short video
Describe it in a sentence; get an image or a short clip in the shape you need.

Voice
Have replies read aloud in natural Indian voices.

Free every day	no card needed
Premium ₹100 a month + GST	until 31 Dec 2026

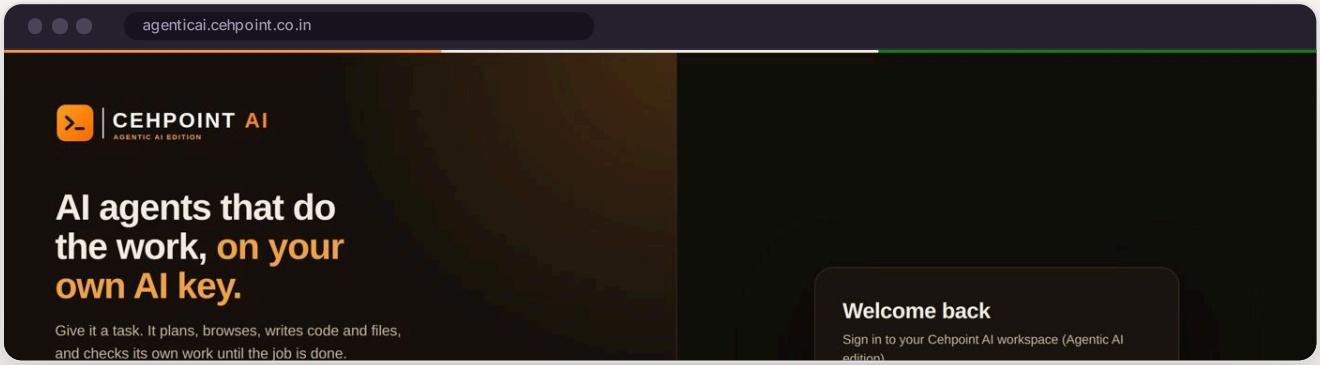

Things people ask on day one

- 18% GST on ₹45,000, split CGST and SGST
- Old vs new income tax regime, simply
- UPI fraud warning signs, in Hindi
- A polite payment reminder to a client
- 3 days in Darjeeling under ₹15,000

CEHPOINT AI · AGENTIC AI EDITION

Agents that do the work.

Give it a task. It plans the steps, searches, writes code and files, works through spreadsheets and documents, and checks its own work until the job is done.

Agents, not just answers

Research, code, spreadsheets, documents and multi-step tasks, carried through to a result.

Your AI key, or ours

Use the AI provider you already pay for, the Cehpoint free allowance, or a Cehpoint commercial key.

Connect your own tools

Add the tool servers your work depends on. Their secrets stay with your account.

Built so one user can never see another's work

Your account

Private workspace
Your chats, memory, uploads and saved keys belong to you alone.

Own sandbox
Your agent's code runs in its own locked-down container, with no admin rights and fixed limits.

Filtered internet
Public web only. Private networks and cloud metadata are blocked.

A colleague

Private workspace
Separate chats, memory, files and keys.

Own sandbox
A separate container, started on demand and stopped when idle.

Filtered internet
The same gate, the same rules.

Another company

Private workspace
A key someone saves is used only for their own chats.

Own sandbox
Only that user's two folders are mounted inside it.

Filtered internet
No route to anyone else's sandbox.

FOR DEVELOPERS

One endpoint. The format you already use.

The Cehpoint AI API follows the standard chat-completions format, so an existing app can switch with one line: point the client at our base URL and set the model to `cehpoint-ai`. Build and test free with no key; move to a paid plan when it goes live.

```
# No key, no sign-up. Free for development and testing.
curl https://ai-api.cehpoint.co.in/v1/chat/completions \
  -H "Content-Type: application/json" \
  -d '{ "model": "cehpoint-ai",
        "messages": [{ "role": "user", "content": "Explain GST in 2 sentences" }] }'

# In production, the same request with a commercial key:
Authorization: Bearer cehk_…   → https://ai-api.cehpoint.co.in/capi/v1
```

What the API does

Chat	Streaming replies, multi-turn context, live web grounding.
Images	Eight aspect ratios, from 1K to 4K detail.
Video	Clips up to 18 seconds at up to 1080p, as durable jobs you can collect later.
Speech	Text to speech in English, Hindi and Bangla voices.
Reader	Any public web page or PDF turned into clean Markdown for your pipelines.

Plans

PLAN	PRICE
Free API Development and testing, 20 requests a minute	**₹0**
Pay as you go ₹420 per million input tokens; images ₹5, video ₹20	**from ₹1,000**
Developer plan Own key, commercial use, Reader API, 24-hour support	**₹5,000 / mo**
Monthly commercial 5,00,000 requests a month, dedicated support	**₹14,999 / mo**

Pay-as-you-go balances never expire. Monthly commercial is + GST.

Priced in rupees
No dollar card, no foreign-exchange markup. Pay by UPI or card.

A GST invoice every time
Indian businesses with a GSTIN can claim the input tax credit.

Docs in three languages
API documentation in English, हिंदी and বাংলা, with tested examples.

COMMERCIAL API · GROUNDED ON YOUR DATA

Your own AI that already knows your business.

Create an API key, switch on **Ground with my data** and upload your files. From then on, every answer on that key starts from your own documents. You don't need to set up a vector database or build and maintain a retrieval pipeline.

STEP 01

Create a key

Open a project in your Cehpoint AI dashboard. Each project gets its own API key.

Ground with my data

STEP 02

Upload your files

One file or a whole folder at once. Price lists, product manuals, policies, past tickets, ERP exports.

PDF DOCX XLSX PPTX CSV TXT

STEP 03

Call the API

Use the same chat-completions request as always. Answers on that key now come from your files.

Up to 25 MB per document

```
# Base URL: https://ai-api.cehpoint.co.in/capi/v1
curl $BASE/chat/completions \
  -H "Authorization: Bearer cehk_…" \
  -d '{ "model": "cehpoint-ai",
        "messages": [{ "role": "user",
          "content": "Dealer margin on the RX-200?"
```

Example answer on a grounded key

Dealer margin on the RX-200?

The RX-200 carries an 18% dealer margin, with a further 2% on orders above 50 units paid within 30 days.

`from: Dealer price list 2026.xlsx`

One key, one knowledge base
Each project key reads only its own files. A second key, even under the same company, never sees them.

Your data comes first
When your files hold the answer, live web search stays out of it, so a competitor's similar product never slips into a reply.

Every upload safety-checked
Files are screened before they are stored. Hidden prompt-injection text and harmful content are refused.

Big files are fine
A 500-row ERP export is added in the background. Progress shows on screen, and you can keep working.

Your brand on every answer
Turn on your own branding for a key, and the AI introduces itself with your name and website.

Team, roles and usage
Owner, admin, member and viewer roles. Usage for each project, with a CSV export.

WHAT YOU DON'T HAVE TO BUILD

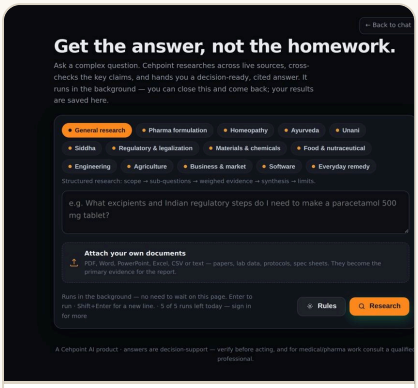

~~Chunking~~ ~~Embeddings~~ ~~Vector database~~ ~~Retrieval tuning~~ ~~Re-indexing~~

Available on every commercial licence. No tech team? Our engineers can load your knowledge for you and add **skills**, written instructions with worked examples, so the AI answers the way your business does.

LABS AND TOOLS

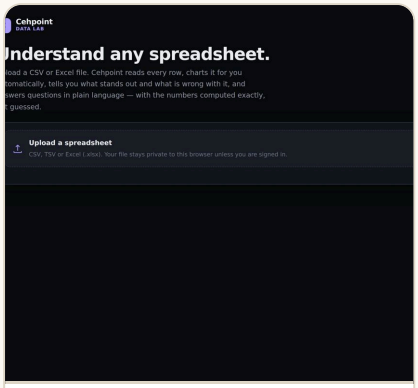

Tools for deeper work.

Beyond chat, Cehpoint AI has tools built for one job each, with the same rule throughout: show the source, and say so when there isn't one.

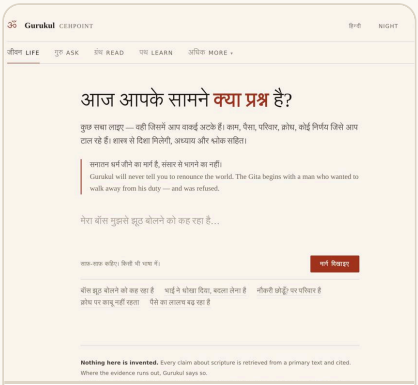

Research Lab

Get the answer, not the homework. Reports built from cited sources, with a confidence check, that keep running if you close the tab.

Data Lab

Upload a spreadsheet and ask questions of it in plain words. Charts and answers come from your own numbers.

Gurukul

Questions answered from the scriptures, cited to chapter and verse. Where no verse supports an answer, it says so.

01	**Arena**	Practise real tasks for your role and get scored against a published rubric, with a skills profile that shows what to work on next.
02	**AI Experts**	An AI CA and an AI lawyer for tax, GST and legal questions: ₹100 per 10-minute consultation, the first one free, and a Cehpoint professional when you want one.
03	**Free AI tools**	Udhaar Khata Health Check, Tax Notice Helper, Scam & Fraud Shield, Licence & Registration Navigator and more. No login and no payment.
04	**Voice**	Talk to Cehpoint AI and hear it answer, in English, Hindi and Bangla.

GENERATIVE AI FOR FASHION AND STUDIOS

One product photo in. A whole catalogue out.

Photograph the garment once. Cehpoint AI puts it on a model in whatever setting you choose, and keeps the colour, border and weave of the real piece. It works for sarees, kurtas, lehengas, western wear and jewellery, and for marketplace listings, your own website and social posts.

Every image on this page, garments included, was made on Cehpoint AI for this brochure. In a studio, the input is your own product photo.

The same process for menswear.

Product photo to model photo
Choose the model, pose and background. The garment stays true to the real piece.

A whole collection in one batch
Queue an entire season. Each job runs to completion in the background and is ready to download.

Short video for reels
Turn a look into a 5 or 10 second clip, in 9:16 for reels or 16:9 for the website.

Every channel's size
Square, portrait, story and banner shapes, up to 4K.

Where it pays

You don't book a shoot day for every SKU. New designs go live the same day, and one festive look can appear in many settings.

Through the API

Send the product photo with a short brief and get images back. ₹5 an image on pay as you go.

As your own studio portal

A branded studio for your team, with logins, batches and your own storage. Custom builds from ₹2,00,000.

WHERE AI MOVES THE NUMBERS

AI that shows up in your profit and loss.

What matters is which line of the profit and loss a piece of AI moves. These are use cases we build and run for businesses, grouped by where the gain comes from.

Grow revenue · Cut cost and time · Reduce risk

FASHION AND APPAREL

A catalogue without a photoshoot

On-model photos and short videos from one product photo, for every channel.

Gain: more styles go live, sooner.

RETAIL AND D2C

Listings in three languages

Titles, descriptions and answers to buyers in English, Hindi and Bangla, from your product sheet.

Gain: reach buyers who don't shop in English.

ANY COMPANY WITH KNOW-HOW

Sell your own AI assistant

Your expertise as an AI product under your brand, grounded on your documents and sold to your customers.

Gain: a new revenue line from what you already know.

CUSTOMER SUPPORT

Answers from your own manuals

A support assistant that replies from your policies, price lists and past tickets, at any hour, and passes hard cases to a person.

Gain: fewer repeat tickets for your team.

FINANCE AND ACCOUNTS

Invoices in, books out

Bills read automatically into the books, with GST matched and the due dates on a calendar.

Gain: fewer hours on data entry, fewer missed dates.

LAW AND CA FIRMS

First drafts in minutes

Notice replies, contract reviews and case diaries, drafted by AI and signed off by a professional.

Gain: more matters for each professional.

BANKS, FINTECH, RETAIL

Scam and fraud screening

Check suspicious messages, payment requests and links for your customers and staff before they act.

Gain: less money lost to fraud.

ANY AI PRODUCT

Red-team it before launch

Test your chatbot or agent for prompt injection, data leaks and unsafe actions, then fix what we find.

Gain: no public incident on launch day.

MANUFACTURING AND TEXTILE

Defects caught on the line

Cameras on the inspection line flag fabric or stitching defects as they happen.

Gain: fewer rejects and returns.

Start with one number.

Before we build, we agree the one figure the work should move, such as hours spent each week, days until you get paid, listings live or tickets closed. Then we show you a working demo against it before you commit.

FROM A FIRST ASSISTANT TO A NEW BUSINESS

Three steps of AI transformation.

Most companies don't jump straight to an autonomous enterprise. They move in steps, and each step should pay for itself before the next one starts.

01

Assist

People do the same work, faster. Chat, drafting, research and document reading for every desk.

Cehpoint AI Chat, Research Lab, Data Lab, AI Experts

02

Automate

Routine flows run end to end, and a person approves what matters. Agents carry the work across your tools.

AI agents, the business desk, grounded support, AI interviews

03

Transform

AI becomes part of what you sell: new products, new services and new revenue lines.

Your branded AI on our API, AI studios, white-label assistants

More of what we build

01	**Sales follow-up**	AI finds likely buyers near you and drafts WhatsApp follow-ups, and your team decides what gets sent.
02	**Hiring**	A first-round AI interview by voice, scored against the role, with a person making the final call.
03	**Clinics and pharma**	A white-label clinical assistant for your patients and staff, grounded on the guidance you approve.
04	**Real estate and travel**	Listing images and short videos made from a few phone photos.
05	**Collections**	See which dues are stuck, then send polite reminders in each customer's language.
06	**Police and investigation**	Evidence logged with a fingerprint the moment it arrives, and the statutory deadlines kept in view.
07	**Education**	An AI tutor that explains in the student's own language and cites its sources.

Build it yourself

On the Cehpoint AI API, with your data grounded on your own key. Pay as you go from ₹1,000.

One AI agent for one job

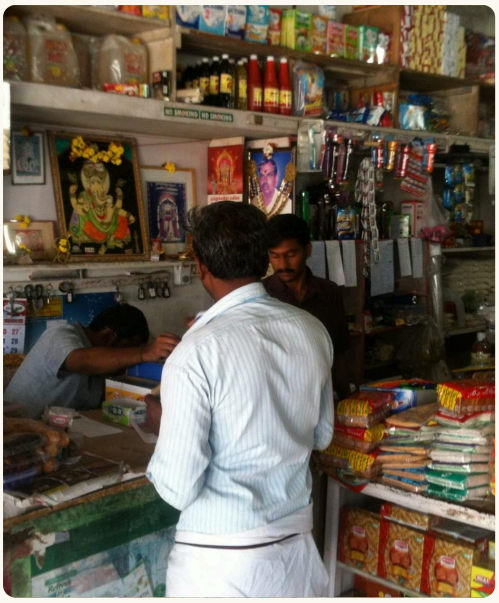

Built around how your business works, on its own server. ₹50,000 including GST.

A custom build

A retrieval or multi-agent system on your data, from ₹2,00,000. Fixed in writing first.

AI FOR THE INDIA THAT WORKS

AI for the kirana counter, the mandi, the court diary, the gram sabha and the handloom.

Ask the way you would ask a person

मेरे GST नोटिस का जवाब कैसे लिखूँ?

আজ পাইকারি বাজারে পেঁয়াজের দাম কত?

A polite reminder for ₹4,200 udhaar, unpaid for 60 days

01 Kirana and retail
02 MSME manufacturing
03 Handloom and crafts
04 Agriculture and FPOs
05 Colleges and coaching
06 Hiring and placements
07 Law firms
08 Law enforcement
09 Government and panchayats
10 Clinics and pharmacies
11 CA and accounting
12 Export and logistics
13 Hospitality and travel
14 Freelancers and creators
15 Startups

Recover udhaar without spoiling the relationship

Photograph the baki khata. See how much money is stuck, for how long and whom to call first, with polite WhatsApp reminders in the customer's own language.

Stop the "approve this UPI request to receive money" trick

Paste the message a "customer" sent and get a straight answer: is it a scam, what are the red flags, and what to do next.

Read a tender before you bid on it

Upload the specification and get the requirements pulled out and checked against your criteria, so clause 14 does not surprise you after you win.

Understand the tax notice, then draft the reply

For CA firms, accountants and the businesses they serve.

Photos: Ask27 (CC BY-SA 3.0); RioRiyoRio (CC BY 4.0); Eskay001, Mendhalekha, রবিরশ্মি রায় (CC BY-SA 4.0); Wikimedia Commons

Security is where we started.

We learned how systems are attacked before we learned how to build AI. Everything we ship is tested by people who think like attackers, and the same people test our clients' systems.

Calcutta High Court, Kolkata. Photo: রবিরশ্মি রায়, CC BY-SA 4.0, Wikimedia Commons.

CYBER SECURITY SERVICES

Find the gaps before an attacker does.

Testing, monitoring and audit readiness from the team that also builds software, so findings come with fixes your developers can apply, and a retest to prove they hold.

SERVICE	WHAT YOU GET	FROM
VAPT and penetration testing	Web, mobile, API, network and cloud, as scoped. Prioritised findings with reproduction steps and fixes, then a retest.	**₹24,999**
AI red teaming and LLM security	Prompt injection, jailbreaks, system-prompt extraction, data leakage and unsafe tool use in chatbots and agents, with code-level fixes.	**₹75,000**
Managed SOC and MDR	Continuous log monitoring, threat hunting and incident response for the systems you run.	**₹49,999**
Virtual CISO	Security leadership, client security questionnaires and board advice, without a full-time hire.	**₹99,000**
ISO 27001 and SOC 2 readiness	Gap assessment against the standard and help closing findings before the formal audit.	**₹1,25,000**
DPDP Act compliance	What India's data protection law asks of your business, and the changes to make.	**₹39,999**
Digital forensics	Breach, fraud and insider investigations, with evidence handled so it can stand up in court.	**On scope**

Prices are for India, plus GST, and fixed in writing after a short scoping call.

01

Scope

Agree the targets, rules of engagement and what success looks like.

02

Test

Run the assessment across the agreed surface, the way an attacker would.

03

Report

Prioritised findings, reproduction steps and the fix for each one.

04

Harden

Fix alongside your team, retest, and set up monitoring.

Frameworks we work to

ISO 27001 · SOC 2 · PCI-DSS · CERT-In · DPDP Act · NIS2 · EU AI Act · Cyber Essentials

We don't just hand you a PDF. Our engineers help fix what the tests find, then retest to confirm it is closed.

Safety built into our AI

An AI company that started in security should be held to a higher standard. These are the rules our platform follows today.

WHAT THE PLATFORM DOES

It shows its sources. Answers that depend on current facts are checked against the live web, and the reply says where each fact came from.

It says when it does not know. Gurukul tells you when no verse supports an answer instead of inventing one. Research reports carry a confidence check.

It refuses what it should. Requests for the synthesis of controlled or dangerous substances are declined, with the reason given.

It keeps each user's work separate. On Agentic AI, one person cannot see or use another person's chats, memory, files, keys or sandbox.

It scans only what you own. Active vulnerability scans run only on domains you have verified. Private and internal network ranges are always blocked.

It gives you your data. You can download everything you have stored with us, or ask for it to be deleted.

INSIDE CEHPOINT AI

A security toolkit, on the same platform

Vulnerability scanner	Background web scans for SQL injection, XSS, IDOR, JWT flaws and more, with SARIF, JSON, HTML and Word reports and a plain-language summary.
LLM red-team scanning	Point it at any compatible model endpoint to probe for prompt injection, jailbreaks, encoding bypass and data leakage. For licensed researchers; results are deleted after 7 days.
Recon and OSINT	WHOIS, DNS, certificate-transparency subdomains and reachable ports, on authorised targets only.
CVE intelligence	Mention a CVE and get its description, CVSS score and fix status, pulled live from the trackers.
Researcher licences	Security researchers pass a short exam to unlock authorised scanning. Each licence has a public number anyone can verify.

Data protection
dpo@cehpoint.co.in

Grievances
grievance@cehpoint.co.in

Security incidents
certin-reporting@cehpoint.co.in

From a first agent to an enterprise licence.

Start with one job you want off your team's plate, or license Cehpoint AI for the whole company. Every price below is the one our checkout charges.

OPTION	WHAT IT INCLUDES	PRICE
An AI agent for one job	Built around how your business works, on its own server, connected to your tools, with a runbook and 30 days of unlimited support. Live the next working day when paid in full.	**₹50,000** incl. GST
Business AI, lifetime	Your own commercial Cehpoint AI for the life of your business, on a lifetime server that is set up, secured and backed up.	**₹50,000** + GST
Annual licences	By company size, from Startup to Enterprise, with 50,000 to 20,00,000 requests a month. Enterprise adds a written SLA, a security review and grounding on your data.	**₹60,000–₹4,00,000** a year + GST
Custom AI build	A domain-tuned retrieval or multi-agent system built on your own data.	**from ₹2,00,000**
On-premise deployment	Cehpoint AI on your own servers, for teams whose data cannot leave the building.	**from ₹7,00,000**
Lifetime commercial licence	Permanent commercial-use rights, usually alongside an agent engagement.	**₹8,30,000** + GST

Prices for India. Launch prices valid until 31 December 2026. Clients outside India receive a written quotation in their currency.

Where companies usually start

Legacy modernisation	Replace old systems without stopping the business.
AI agents and automation	Hand routine work to AI, with a person in charge.
Data and decisions	Turn scattered data into daily decisions.
Customer experience	Make it easier to find you, buy from you and stay.
Smart operations	See and fix what happens on the floor, field and fleet.
Cyber resilience	Make security part of how you build and operate.
Cloud and private AI	Run faster on infrastructure you control.
New products	Test something new without betting the company.

HOW WE WORK

Something real before you pay for it.

01

Tell us the problem

A short call or message about what you need, in English, Hindi or Bangla.

02

Scope and a fixed quote

Deliverables, timeline and price agreed in writing before any work starts.

03

Build, test, review

You see progress as it happens. Nothing goes live without your sign-off.

04

Handover and support

Access, documentation and support. You own what we built.

Talk to a senior engineer first

A one-to-one consultation of up to 45 minutes for ₹1,000 + GST, booked online. If you hire us within 60 days, the ₹1,000 comes off your first invoice. A quick chat with an expert is ₹100 + GST.
